DETAILED ACTION

Double Patenting

1. Claims 44-51 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 5-9 of copending Application No. 12/152016. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are both to overlapping subject matter directed to a semiconductor lighting device having both an SiC emissive layer containing Nitrogen and one of boron or aluminum, and an excitation layer comprising a composition used to excite the SiC layer. The level of dopant concentration in either application represents an overlapping range of incorporation. Thereafter, one of ordinary skill would need only to choose amongst this overlapping range to arrive at the invention as claimed.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

Applicant's arguments with respect to claim 44 have been considered but are moot in view of the new ground(s) of rejection. The amendments to the claims resolve the 112 issues presented in the previous communication; however, with the change in the scope of the claims, a provisional ODP has been introduced. It is noted that the claims of the copending application have been found allowable and the issue fee for the application has been paid. In light of this, the provisional rejection will soon be non-provisional.

Conclusion

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
